BINGHAM LTD.

DEVASTATOR. Issues

In the late 1970's, BINGHAM LTD. starting producing cartridges with explosive bullets by taking hollow paint bullets from other manufacturers and adding an explosive mixture in the hole of the hollow point. They then packed these in their own boxes.

Back

These rim fire cartridges are designed to deliver maximum energy at normal shooting ranges. They are made of precision built non corrosive components and assembled to rigid specifications. We warrant reasonable care in manufacture of these cartridges but make no other warranty, expressed or implied.

Front

CAUTION
This ammunition should be fired only in arms in good condition, originally chambered for it and so marked on the barrel. If in doubt as to whether these cartridges are safe to use in your gun, check with a qualified gunsmith or the gun's manufacturer. Before loading be sure there are no obstructions in the barrel. Wear proper hearing protection and shooting glasses.

"C-10" h/s

"SU-1" h/s
