

OMNISHOCK DEFENSIVE AMMUNITION

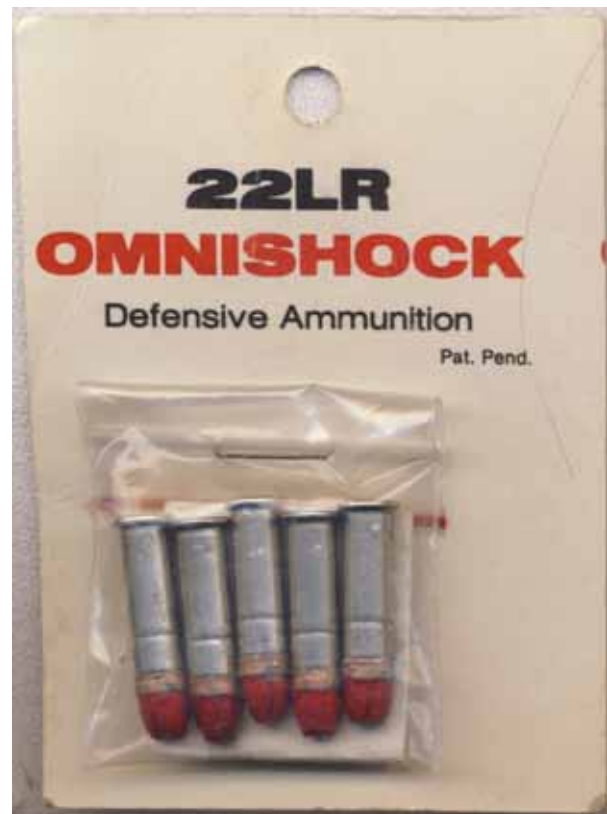

Misc. Issues

This company produced centerfire pistol ammunition with rapid expanding bullets. These were generally loaded into cases of the major manufacturers. During 1999, a small run of .22 long rifle ammunition was produced for a test marketing. No other information is available on this company at this time.

OMNISHOCK DEFENSIVE AMMUNITION

Misc. Issues

Card Back

Insert

- LR-1 **.22 LONG RIFLE.** This is a single round packed in a plastic bag which has been stapled to a white header card with red and black printing. The round is a standard CCI Stinger which has a modified bullet. The bullet has been segmented into 4 parts and a small wood screw has been screwed into the hollow point cavity_ The bullet has then been painted red. An paper insert is folded up and included in the plastic bag. This insert gives the details of Omnishock ammunition. This offering was the sales sample produced in 1989.
- LR-2 **.22 LONG RIFLE.** This has five rounds packed in a plastic bag which has been stapled to a white header card with red and black printing. The rounds are standard CCI Stingers which have modified bullets. Each bullet has been segmented into 4 parts and a small wood screw has been screwed into the hollow point cavity. The bullets have then been painted red. A paper insert is folded up and included in the plastic bag. This insert gives the details about Omnishock ammunition.
