GERMANY

INTRODUCTION

The original Dunn WEST GERMANY has been merged into this GERMANY upgrade. After WWII it was informally called West Germany, but it was officially called the **FEDERAL REPUBLIC OF GERMANY**.

On March 10, 1994 under the Berlin/Bonn Act, Germany was officially reunified. For convenience sake we have kept East Germany separated into it's own section.

As of 2012 the unified Germany has an area of 137,847 sq. miles and a population of 81.8 million people (2010). Berlin is its capital and the Euro is its currency.

As a manufacturing nation, arms and ammunition was one of the products produced. .22s seem to date back to at least the 1880s and many different manufacturers and private label sellers existed. They exported .22s to all parts of the world. Target shooting was a loved sport, their Schuetzen rifles were weapons of great precision. Due to their interest in target shooting, target loadings were part of most manufacturer's product line.

The original Dunn described some h/s as “**BOMBE**”. It is not clear if this was meant to be a “2-24 raised” or “2-25”impressed “h/s.

GERMANY

Manufacturers

A&W ALLENDORFF. This was a manufacturer who produced Floberts and .22s prior to World War I. Their offices and factory was in Schoenbeck

ALLERMAN. Boxes read on ends: PRODUCED for SCHIEß-SPORT CEENTER ALLERMANN D-2802 OTTERSBERG.

BRAUN & BLOEM. This company was a manufacturer with their offices and factory in Dusseldorf. They produced Floberts and .22s prior to World War I. Dates of operations are not known at this time. They produced very colorful boxes.

DEUTSCHE WAFFEN MUNITIONSFABRIKEN. D.W.M. was a manufacture who produced Floberts and .22s, plus a complete line of both sporting and military ammunition. It is assumed that they started producing .22s sometime before 1912. Their offices and factories were in Baden. They were major exporters of .22s to the world. They produced military .22s during World War II, however they did not resume production after the war.

DYNAMIT NOBEL AKTIEN-GESELLSCHAFT-DAG. Dynamit Nobel AG is a German chemical and weapons company whose headquarters was in Troisdorf. It was founded in 1865 by Alfred Nobel. Present day RUAG

G.C. DORNHEIM A.G. This manufacturer produced Floberts and .22s in Suhl prior to World War II. They do not seem to have resumed production after the war. Boxes are rare. In fact, there was no box available for this catalog at this time.

DREYSE & COLLENBUSH. Dates of production for this manufacturer are not known at this time. It is assumed that they produced .22s and Floberts prior to World War I and did not resume production after 1918. Their offices and factory were in Soemmerda.

GEORG EGESTORFF. This manufacturer had offices and perhaps factories in both Linden and Hanover. They produced Floberts and .22s prior to 1918, and it is not known if they resumed production after the war. All of their boxes are hard to locate at this time.

FRANKONIA. This is a private label seller who had at least one loading and special box produced for them by R.W.S. in about 1985. Other details are unknown at this time.

GECO- GUSTAV GENSCHOW & COMPANY. Genschow first started producing ammunition in 1899 and started producing .22s before World War I. Their offices and factories were located in Durlack. In 1927, they were acquired by I.G. Farbenindustries, at the same Farben acquired R.W.S. While they produced ammunition for the military during World War II, they do not seem to have produced military .22s. They did not resume production after the war.

EDWARD KETTNER. Manufactured under contract by RWS around 1989 for Eduard Kettner of Germany.

LAPUA. Company is located in Finland but also has cartridges manufactured in Germany.

GERMANY

Manufacturers

NOBEL & CO. (Also known as Dynamit Nobel). This manufacturer started producing explosives in 1865. In 1889, they purchased controlling interest in R.W.S., which then allowed them to enter the ammunition business. In 1931, they formally merged with R.W.S. which should have been the beginning of .22 boxes bearing the Nobel brand.

In 1937, Nobel acquired controlling interest in Genschow and Co. Genschow was then merged into Nobel in 1959. While Nobel was a major producer of ammunition during World War II, they did not seem to produce .22s for the military. After the war they produced .22s under the R.W.S. brand and Floberts under the Nobel brand. They have facilities in both Nuernburg and Troisburg.

Nobel also gained control of a major share of the ammunition industry of England during the 1920s and 1930s. Nobel became one of the world's largest companies with interests all over the world. Their product lines were varied. They are still in business as of 2012

RHEINISCH WESTFALISCHEN SPRENGSTOFF. R.W.S. founded a factory in Troisdorf in 1866 for the production of primers and detonators and a little while later annexed an ammunition and powder factory. In 1889 they also purchased Heinrich Utendoerffer, a manufacturer of primer caps.

It is not known when R.W.S. produced their first .22s, but probably well before World War I. For the most part, they sold Floberts under the Utendoerffer brand and .22s under the R.W.S. brand. In 1889 Nobel purchased R.W.S but they continued to operate as a separate company until 1931. In that year the final merger of R.W.S. and Nobel took place. R.W.S. was a major producer of ammunition for the military during World War II, including .22s. They developed steel cases when copper was not available. They were also a major developer of target ammunition and they enjoyed export sales all over the world. After World War I, R.W.S. resumed production in the late 1940s and are still in production.

SELLIERS & BELLOT. While this was a manufacturer from Czechoslovakia they operated a factory in Schonebeck, hence they are included in the German section as well as the East German section. They opened this plant in 1929 and it is still in operation today. No wartime boxes have been noted.

SCHUCHARDT & SCHUTTE. This company produced .22s for use in sub caliber auxiliary cartridges prior to World War II. Their offices were in Berlin, London and New York. They do not seem to have produced .22s for general use.

SK Jagd. A subsidiary company of the Finnish ammunition company Lapua

TEMA SPORT. This is a private label seller which had at least one box produced for them about 1985. Other details are not known at this time.

H. UTENDOERFFER. Heinrich Utendoerffer was founded in Nuremberg in 1856. They produced primer caps until they were acquired by Nobel in 1886. It is not known when they started producing Floberts and .22s, but probably before 1914. This is the brand which Nobel used to sell Floberts under and their .22s were branded Nobel. Some .22 boxes with the Utendoerffer name on them are known to exist. No post World War II boxes are known to exist.

VEREINIGTE ZUNDER. This manufacturer produced .22s prior to and during World War II. They did not resume production after the war. Their offices and factory were located in Meissen. Their history is not known at this time.

Unclassified Misc. section at the rear of German section for boxes which the manufacturers are not known at this time.

DEUTSCHE WAFFEN MUNITIONSFABRIKEN War Time Issues

Produced from approximately 1936 to 1943 or 1944, these boxes were produced under war time conditions. It is surprising that any of these boxes exist today. As copper became hard to get, D.W.M. started producing with steel cases. These boxes will be listed by year of production due to the changes forced as the war progressed.

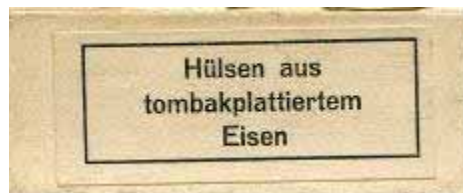

- LR-1 **.22 LONG RIFLE (MILITARY)**. Produced in 1936. White box with black printing. One-piece box with end flaps. "BOMBE" h/s on a copper case. Lead bullets. Various codes on top.
- LR-2 **.22 LONG RIFLE (MILITARY)**. Produced in 1937. White box with black printing. One-piece box with end flaps. "BOMBE" h/s on a copper case. Lead bullets. Various codes on top.
- LR-3 **.22 LONG RIFLE (MILITARY)**. Dated 1938. Cases are copper-washed steel. White over-label making change to "Lfg.:3 1938".

- LR-3.5 **.22 LONG RIFLE (MILITARY)**. Dated 1938. Similar to LR-3 but has a white over-label making change to "Lfg.:3 1938".
- LR-4 **.22 LONG RIFLE (MILITARY)**. Dated 1939. Large size box.

- LR-5 **.22 LONG RIFLE (MILITARY)**. Dated 1940. Large size box. Copper cases. Label is pasted to the box.
- LR-6 **.22 LONG RIFLE (MILITARY)**. Dated 1941.
- LR-7 **.22 LONG RIFLE (MILITARY)**. Dated 1942. Large size box. Label is pasted to the top over another label. Copper washed steel bullets.

- LR-8 **.22 LONG RIFLE (MILITARY)**. Dated 1943. Large size box. Printed directly on box. Copper washed steel cases. Various codes on top.

NOBEL & CO. PreWar Issues

Nobel started by producing explosives in 1865. In 1889 Nobel purchased controlling interest in R.W.S., which allowed them to enter the ammunition business. In 1931 they formally merged with R.W.S. This should have been the first of the .22s with the Nobel name on them.

In 1937 Nobel acquired controlling interest in Genschow & Co. Genschow was then merged into Nobel in 1959. Nobel generally only produced Flobert cartridges after WW II. They allowed the R.W.S. brand to produce the .22s after the war. No war time issues have been noted at this date. The prewar issues are presented here without any attempt to break out domestic and export issues.

- S-1 **.22 SHORT.** Red and white box with white printing. Pill box style box with tray. "R-8" h/s on a copper case. Lead bullet, Variations noted:

GERMANY

RHEINISCH WESTFALISCHEN SPRENGSTOFF

Pre 1931 Domestic Issues

R.W.S. founded a factory in Troisdorf in 1886 for the production of primers and detonators and a little while later annexed an ammunition and powder factory. In 1889 R.W.S. purchased Heinrich Utendoerffer, a manufacturer of primer caps.

It is not known when R.W.S. produced their first .22s, but probably well before WW I. For the most part, the Flobert caps were sold under the Utendoerffer label, but some R.W.S. Flobert items are shown. In 1889 a majority control of R.W.S. was purchased by Nobel, but R.W.S. continued to operate as a separate company until 1931. In that year the final merger of Nobel and R.W.S. took place. New packaging was introduced in 1931. This section of the catalog will cover the items produced by R.W.S. pre 1931, without attempting any more breakdown.

- S-1 **.22 SHORT.** “SCHTARZPULVER [BLACK POWDER]”. Green label with white printing One-piece box with end flaps. Green side sealing label with white printing. Label only is known at this time.

RHEINISCH WESTFALISCHEN SPRENGSTOFF

1950-1976 Issues

After WW II R.W.S. did not start producing .22s again until the late 1940s. They seem to have started production with the same style of box that they produced prior to the war. Sometime in the early 1950s, they introduced a new style of box. This box was produced until the 1970s.

RHEINISCH WESTFALISCHEN SPRENGSTOFF

1970 Issues

Sometime during the 1970s R.W.S. redesigned their packaging. This style is still current. Exact dates or introduction are not known. All bottoms are the same except for color.

There are four different formats of ends. You may consider that any of these formats may be on your box. There are also two types of die-cuts on the flaps. See examples below.

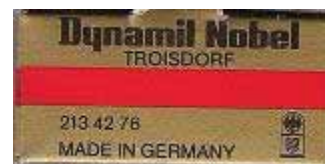

- S-1 **.22 SHORT**. Green, silver and black box with black and white printing. One-piece box with end flaps. "R-8" h/s on a plated case. Lead bullet. TROISDORF markings on ends.

- S-1.5 **.22 SHORT (PROOF)**. S-1 box with red over-label with black printing stating: Achtung! Beschußmunition , [[Attention! bombardement munitions](#)] ([WARNING PROOF](#))

- S-2 **.22 SHORT (TARGET)**. "R 25". Gold, red and black box with white and black printing. One-piece box with end flaps. "R-8" h/s on a nickel plated case, Lead bullet. This is rapid fire loadings for pistol.

- S-3 **.22 SHORT (GALLERY)**. S-1 box with white over-label with black printing stating: .22 Kurtz Gallery. "R-9" h/s on a plated case. Wrought iron bullet.

RHEINISCH WESTFALISCHEN SPRENGSTOFF MADE for EXPORT

The Society or Miniature Rifle Clubs was an organization much like the N.R.A. of the U.S.A. except it was interested primarily in target shooting with the .22 rifle. It had a very large membership. They contracted with R.W.S. of Germany to produce special loadings for them. These boxes were produced in the 1930s.

SELLIERS & BELLOT Schonebeck Plant

SELLIERS & BELLOT. In 1929, a branch of Selliers & Bellot of Czechoslovakia was established in Schonebeck Germany. This company soon reached the manufacturing capacity of the parent company in Prague.

The parent and the branch produced the same assortment of cartridges, so it is assumed that .22s were produced by this plant pre World War II, however no boxes were available for cataloging. The factory is now in East Germany and still produces .22s under the name of VEB Sprengstoffwerke, Schonbeck.

LR-1 **.22 LONG RIFLE.** "VVB ORGANA". Red and white box with white printing. Large, one-piece box with top flap. "SB-10" h/s on a copper case. Lead bullet.

VERINIGTE ZUNDER PreWar Issues

The dates of production of .22s and company history is unknown. They did produce .22s in the 1930s and during the war. No postwar .22s are known to exist and it is assumed they never produced .22s or any other cartridges after the war.

United igniter and cable Werke AG, Meissen - Date: 1872 - 1951

History: The company was founded in 1864 as a company Langhoff & Co and bought by the Englishman William Henry Eales in 1866. 1872 The formation of the joint stock company United English factories safety igniter, Meissen.

The company was founded in 1896 in United English factories safety fuse, wire and cable works, Meissen AG and renamed in 1915 in United igniter and cable Werke AG Meissen.

On the basis of the referendum in Saxony on 06.30.1946 the company was expropriated and nationalized. The company operated then as VEB Kabelwerk Meissen.
